Superstore Storyboard – Insights & Visuals

★ Overall Insights (Unfiltered Dashboard)

- 1.Total Sales = ₹2.30M spread across all 3 categories.
- 2.Total Orders = 5009, showing strong customer activity.
- 3.Profit = ₹286K and profit margin = 12% → business is profitable.
- 4.Technology is the top-performing category (~₹0.84M).
- 5.Furniture and Office Supplies follow closely (~₹0.74M & ₹0.72M).
- 6.Phones, Storage, Chairs & Machines dominate sub-category sales.
- 7.Bookcases, Tables & Appliances show lower profit despite fair sales.
- 8.Standard Class = 59% of all deliveries, making it the most used mode.
- 9.Sales are concentrated in states like California & New York.
- 10.Profit vs Sales scatter shows high variation, meaning some products sell high but earn low profit (e.g., Bookcases).

★ Visual-Level Insights (Supporting Analysis)

1. Sales by Category — Insight
 - Technology is the top revenue-generating category (~₹0.84M).
 - Furniture and Office Supplies contribute almost equally (~₹0.74M & ~₹0.72M).
 - Sales distribution is fairly balanced, but Technology clearly leads.
2. Sales by Sub-Category — Insight
 - Phones, Storage, Chairs, and Machines are the strongest performers.
 - Tables and Bookcases generate decent sales but are known to have low profit margins.
 - Binders, Paper, Furnishings, and Supplies contribute minimal overall revenue.
3. Sales by Ship Mode — Insight
 - Standard Class dominates (~59%) → customers prefer economical shipping.
 - Second Class contributes ~20%.
 - First Class + Same Day together account for <20%, showing low premium delivery usage.

4. Sales by State (Map) — Insight
 - Highest sales from California, New York, and Texas.
 - Central and South show low density → potential growth regions.
 - Clear dominance from East and West coasts.

5. Profit vs Sales (Scatter Plot) — Insight
 - Phones, Accessories, Machines show strong profit and sales → high-value items.
 - Tables, Bookcases have moderate sales but low profit → need pricing correction.
 - High variation across bubbles shows inconsistent profitability across sub-categories.
 - Several items produce sales but negative/low profit → discount/cost issue.

Summary & Business Recommendations

★ Filtered Insights (4 Filtered Dashboards Combined)

a. Filter 1 — Category: Office Supplies, Region: West, Segment: Home Office Insights:

- 1.Total Sales ≈ ₹15.11K; Profit Margin ≈ 27%, highest among filtered views.
- 2.Bindings and Storage drive most sales.
- 3.West region performs well for Office Supplies.
- 4.Shipping split (Second Class, First Class, Same Day) is balanced.

b. Filter 2 — Category: Furniture, Region: South, Segment: Corporate Insights:

- 1.Sales ≈ ₹12.25K; Profit Ratio = 5%, lowest among filtered dashboards.
- 2.Chairs dominate sales, but profit is weak.
- 3.South region underperforms.
- 4.Shipping preference: First Class & Second Class distributed 50–50.

c. Filter 3 — Category: Technology, Region: East, Ship Mode: Second Class, Segment: Consumer Insights:

- 1.Sales ≈ ₹15.94K; Profit Margin ≈ 15%.
- 2.Subcategories Phones & Accessories are strong players.
- 3.East region shows stable technology demand
- 4.100% of orders via Second Class → customer preference trend.

d. Filter 4 — Segment: Home Office, Category: Multiple, Region: Multiple Insights:

- 1.Sales ≈ ₹95.98K; Profit Margin = 11%.
- 2.Office Supplies lead, followed by Furniture.
- 3.Only Standard & First Class shipping used.
- 4.Profit vs Sales shows mixed performance across subcategories.

★ Key Business Learnings (Storytelling Summary)

- 1.Technology is the most profitable and highest revenue category.
- 2.Furniture has good revenue but weak profitability.
- 3.Office Supplies are steady performers with pockets of high-profit items (Binders).
- 4.Shipping methods influence profitability — Standard Class is most cost-efficient.
- 5.Regional variation is high — West & East perform well; South struggles.
- 6.Certain subcategories require action:
 - Bookcases → High sales, very low profit.
 - Tables → Moderate sales, very low profit.
 - Paper, Envelopes → Low margin products.

Filtered analysis shows major performance shifts, proving business decisions depend heavily on customer segment + region + ship mode.

★ Recommendations (Strong Business Actions)

- 1.Reduce discounting in low-profit segments like Furniture.
- 2.Promote high-performing subcategories (Phones, Chairs, Accessories).
- 3.Optimize shipping strategy
 - Encourage Standard Class for cost savings.
- 4.Re-evaluate low-profit subcategories
 - Bookcases, Tables, Appliances.
- 5.Boost marketing in weaker regions (South & Central).
- 6.Increase bundle promotions for Office Supply items (Binders, Storage).
- 7.Improve inventory planning based on regional sales patterns.
